• **Extra Features** (see manual on our internet site)
  • Mode Reassignment – *Changing a device mode to set up two (or more) devices of the same type.*
  • Key Magic* - *Allows you to program functions from your original remote control even when LOST or BROKEN.*
  • Macro - *Allows you to send a sequence of commands with the press of a single key.*
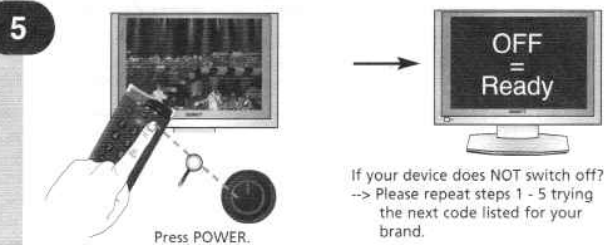

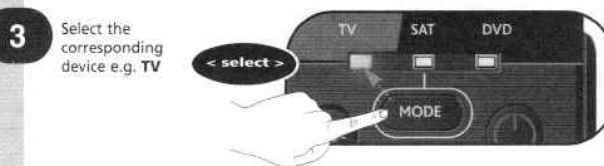

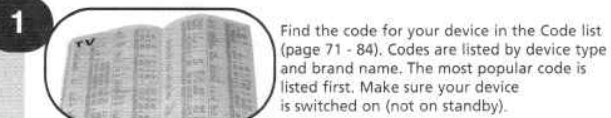

Direct Code Setup does NOT work

(tested SCIMO code 1423 but remote does NOT allow to store any code, LED always blinks once only instead twice)

Direct Code Set Up

1 Find the code for your device in the Code list (page 71 - 84). Codes are listed by device type and brand name. The most popular code is listed first. Make sure your device is switched on (not on standby).

2 Press and hold **magic** for 3 seconds until the blue LED (any LED) stays on.

3 Select the corresponding device e.g. **TV** < select >

4 1 5 7 6 → Enter the 1st code listed for your device type & brand (e.g. TV Hitachi = **1576**)
--> The blue LED will blink twice and then switch off.

5 Press POWER.
OFF = Ready

If your device does NOT switch off?
--> Please repeat steps 1 - 5 trying the next code listed for your brand.

If NOT successful?
--> Try the Search Method.

Congratulations! You should now be able to switch your device back ON and control your device successfully.

Search Method

The Search Method allows you to find the code for your device by scanning through all the codes contained in the memory of the ONE FOR ALL. The Search Method may also work if your brand is not listed at all.

Example: To search for your TV code: Switch on television (not on standby) and aim your ONE FOR ALL at your TV.
1. **Press and hold MAGIC for 3 seconds until the blue LED (any LED) stays on.**
2. Select the corresponding device e.g. **TV**
3. Press 9 9 1. The blue LED will blink twice.
4. Next, press POWER.
5. Press CH+ (over and over) again until your device switches OFF.

You may have to press these keys many times (up to 150 times) so please be patient.

OFF
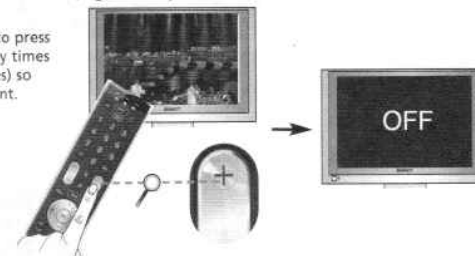

6. As soon as your television turns off, press the **magic** key to store the code.

Congratulations! You should now be able to switch your device back ON and control your device successfully.

Manual Search works

(press CH+ often, about 10 times until SCIMO switches off. Then press magic to store code)

Volume Control

This feature gives you the possibility to set the Volume (VOL+, VOL- and Mute) to always control a certain device (e.g. TV) independent of which device mode is selected.

e.g.: Control your TV Volume in SAT mode.

In this example we will set Volume Control (VOL+, VOL- and Mute) to "TV volume":
1. **Press and hold MAGIC for 3 seconds until the blue LED (any LED) stays on.**
2. Press 9 9 3. The blue LED will blink twice.
3. Select the corresponding device e.g. **TV.**
4. Press and hold the **magic** key for 3 sec. The blue LED will blink twice and then switch off.

Now you have set the Volume Control to "TV volume". The VOL+, VOL- and Mute keys will always control "TV volume" independent which device mode key is selected.

How to deactivate Volume Control
1) **Press and hold MAGIC for 3 seconds until the blue LED stays on.**
2) Press 9 9 3.
3) Press **Vol** +. The blue LED will blink 4 times.
All devices will send out their own VOL+, VOL- and MUTE.

How to remove a device from Volume Control
1) **Press and hold MAGIC for 3 seconds until the blue LED stays on.**
2) Press 9 9 3.
3) Select the **device mode you wish to deactivate** from Volume Control.
4) Press **Vol** -. The blue LED will blink 4 times.
The removed device will send out its own VOL+, VOL- and MUTE.
